

# Powering Construction with Clarity

**Vitus**  
YOUR BIM CO-PILOT

# The BIM Platform that Brings Data to Life

In today's construction industry, many of the biggest risks – from delays to financial setbacks – result from data chaos.

As projects grow in size and complexity, keeping teams aligned becomes harder. **1 in 4 companies struggle to access their own project data**, leading to miscommunication, missed tasks, and costly errors. As construction becomes more digital, working efficiently with BIM data is no longer optional – it is essential.

**Vitus is more than a BIM viewer.** It is a powerful platform that turns 3D models into live, accessible, and actionable information. Whether you're on-site or in the office, Vitus lets you track progress, ensure compliance, and stay updated on quantities and changes – even without BIM expertise.

By providing a shared visual foundation, Vitus ensures everyone speaks the same language and works from the same always-updated data – anywhere, anytime.

Construction with Clarity  
– Powered by Vitus

---

# Streamline. Share. Stay on Track.

Vitus gives you everything you need to bring clarity to complex construction projects – without needing to be a BIM specialist.

From the first design model to on-site execution, Vitus makes your data accessible, updated, and easy to act on – for everyone on the team.

## Always Updated Data

Say goodbye to outdated models. Vitus ensures you're always working with the latest version – quantities, areas, and geometry.

## Reads Any File Type

IFC, Revit, or even DGN – Vitus connects with your existing workflows, no conversions needed.

## Cloud-Based, No Installation

Access your models and dashboards instantly, from any device, anywhere. No downloads, no delays.

## Instant Sharing

Share curated views, dashboards, and specific data with one click. Perfect for aligning teams, fast.

## Available On-site and Off-Site

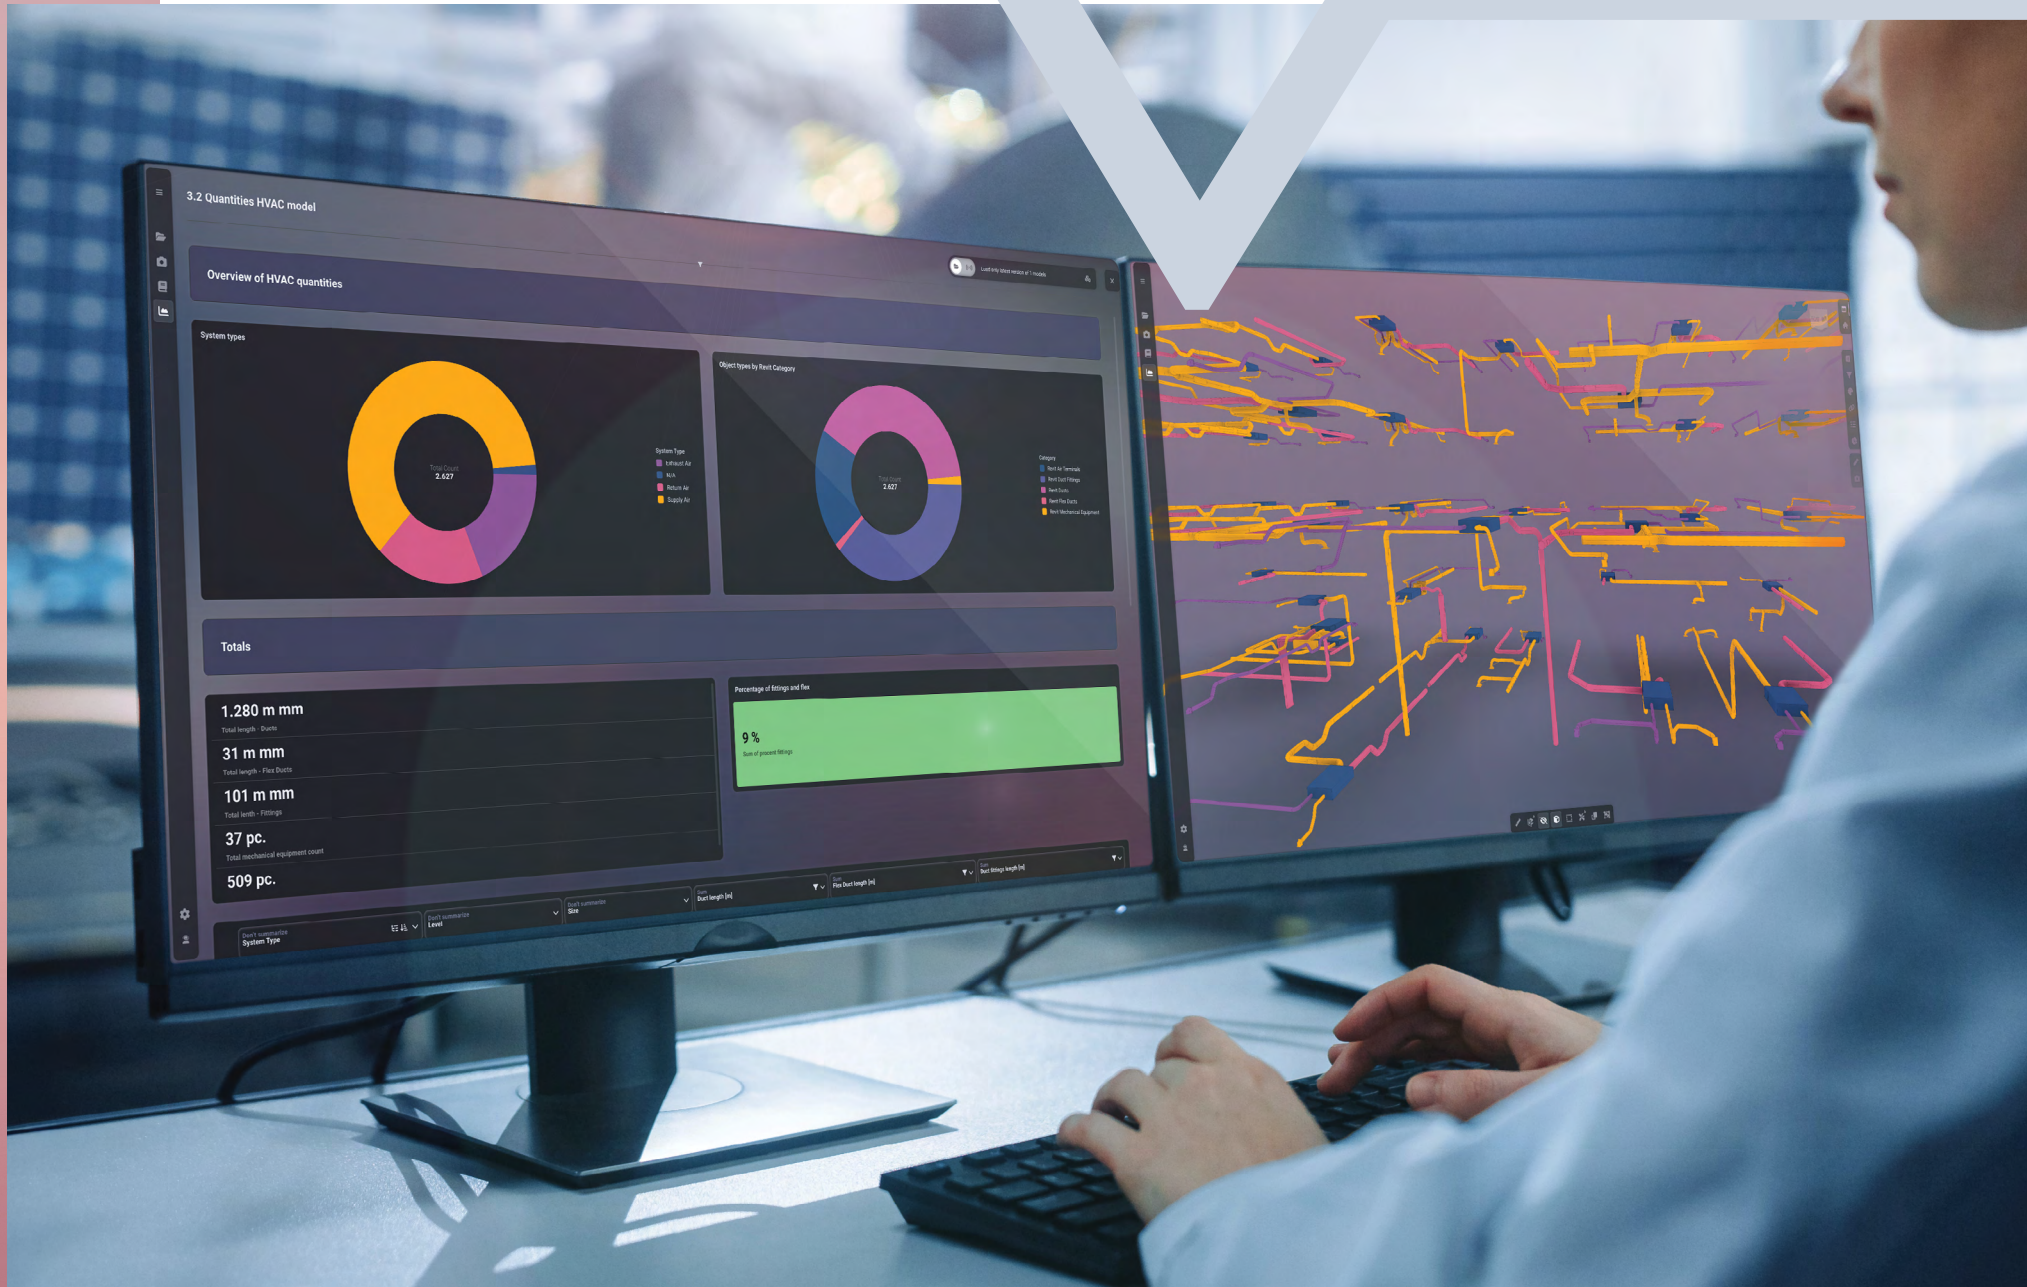

Optimized for site kiosks, offices & tablets – giving every stakeholder the same clear view.

## One-Click Navigation

Quickly jump to the areas and data you need. Take measurements, explore changes, and make informed decisions on the fly.

# Proven Across the Industry

Vitus was built for construction professionals, by construction professionals.

Our team includes engineers and contractors who understand the real-world challenges of managing complex projects – and that hands-on experience is embedded in everything we design.

Today, Vitus is trusted across the industry, powering projects of all sizes – from harbour expansions to the world's longest immersed tunnel. Whether you're a site engineer, architect, project manager, or BIM specialist, you'll feel instantly at ease with Vitus' intuitive platform.

**"With Vitus, everyone on site has easy access to the 3D models and the information we need."**

Jan Peter Johannsen, Project Manager,  
Munck Havne og Anlæg

”

“Vitus enables us to keep everyone on the project updated, regardless of their digital competencies.”

Mike Coombe, Technical Manager,
